Instructions

^ COLLAPSE ^

Visit w3schools and go to the HTML Tutorial: <https://my-learning.w3schools.com/tutorial/html>
Introduction and Basics Lessons 1.1 - 1.7
Formatting and Style Lessons 2.1-2.6, 2.8 - 2.22
Links Lessons 4.1 - 4.3
Forms Lessons 10.1 - 10.6
Visit w3schools and go to the JavaScript Tutorial: <https://my-learning.w3schools.com/tutorial/js>
Introduction Lessons 1.1 - 1.7
Variables Lessons 2.1 - 2.4
HTML DOM Lessons 22.1 - 22.14
Visit w3schools and go to the CSS Tutorial: <https://my-learning.w3schools.com/tutorial/css>
Introduction Lessons 1.1 - 1.6
Links Lesson 11.1
Lists Lesson 12.1
Selectors 16.1 - 16.5

Guide:

Make sure you're in the main branch locally and ``git pull origin main`` any pending changes
Make a new branch per the recommended branch name below (`git checkout -b ...`)
Fill in the items in the worksheet below (save as often as necessary)
Once finished, export the worksheet
Add the output file to any location of your choice in your repository folder
Check that git sees it via ``git status``
If everything is good, continue to submit
Track the file(s) via ``git add``
Commit the changes via ``git commit`` (don't forget the commit message)
Push the changes to GitHub via ``git push`` (don't forget to refer to the proper branch)
Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
Open and complete the merge of the pull request (it should turn purple)
Locally checkout main and pull the latest changes (to prepare for future work)
Take the same output file and upload it to Canvas
*This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better
*Remember, the github process of these files are encouragement for your tracking of your progress

Branch name: M3-HTML-JS-CSS-Readings

Tasks: 12 Points: 10.00

HTML Readings (2.5 pts.)

- ✓ Lesson 16.4 - Attr Selectors
- ✓ Lesson 16.5 - Specificity

Practice Code

Completed lessons 16.1-16.5

Task #1 - Points: 1

Text: Reflect on the topics and refer to the checklist of this task

Checklist

*The checkboxes are for your own tracking

| # | Points | Details |
|-----------------------------|--------|--|
| <input type="checkbox"/> #1 | 1 | Mention specifics of what concepts/topics were totally new to you. |
| <input type="checkbox"/> #2 | 1 | Mention specifics of what concepts/topics you already knew. |
| <input type="checkbox"/> #3 | 1 | Mention specifics of any topics you still don't feel confident about. If everything makes sense so far you can mention so. |
| <input type="checkbox"/> #4 | 1 | At least a few reasonable sentences. |

Response:

Most of this information is new to me, because I have never really done any type of web development before. Learning CSS specifically was fun because that coupled with HTML can make your website look really cool with colors, styles, fonts. That and for the most part coding in HTML and CSS seems very simple and easy. However, Javascript is like learning a whole new language and I am going to have to keep up with the readings and reference them throughout the semester.
